

POST COVID-19 RECOVERY

Experience Life To The
Fullest After COVID-19

Research shows some patients may be experiencing lingering symptoms for an extended period following their acute COVID-19 illness. Symptoms may include fatigue, weight loss, painful joints and muscles, difficulty breathing/shortness of breath, speech difficulties, confusion, anxiety, depression, prolonged loss of smell or taste, and more. We understand it can be discouraging for patients experiencing these persistent symptoms and we are here for you!

Our comprehensive COVID-19 Recovery Program offers an interdisciplinary approach that specifically targets the needs of patients who continue to suffer from COVID-19 symptoms. Our therapy and clinical teams can intervene to assist patients on their recovery journey in a patient-centered environment. As research on COVID-19 evolves, our program will use the most up-to-date research to develop a plan of care to meet the needs of our patients and residents.

To reach our team of experts and learn about our Post COVID Recovery Program, call (205) 487-4211 today!
